

SOLUTION GUIDE

Rapid Onboarding

Connect Everything. Securely.

Problem Statement

Onboarding applications for Identity security controls is a big issue when it comes to the volume of applications. Technology experts, customizations, custom flows, release / change management process and deployment issues become the bottle neck of this process which has huge resistance on onboarding of an application to IAM.

Application onboarding service through Simeio IO provides a frictionless onboarding experience across multiple IAM services. This is complete persona based (application owner), from managing the application to onboarding the IGA controls like Life Cycle Management (LCM), Access request, Access certification etc. With the application onboarding service, enterprises are enabled to onboard applications seamlessly to other IAM services like Single Sign On and Privileged Access Management.

Customer Value

Simeio IO enables adoption to the identity controls in the organization and provides greater ROI, cost saving etc.

It's been deployed with multiple customers – Customer have established the rapid onboarding program and onboarded hundreds of applications a year to enable more adoption to the overall IAM program.

Application Intelligence

Automated Onboarding

Standardization

Convergence & Governance

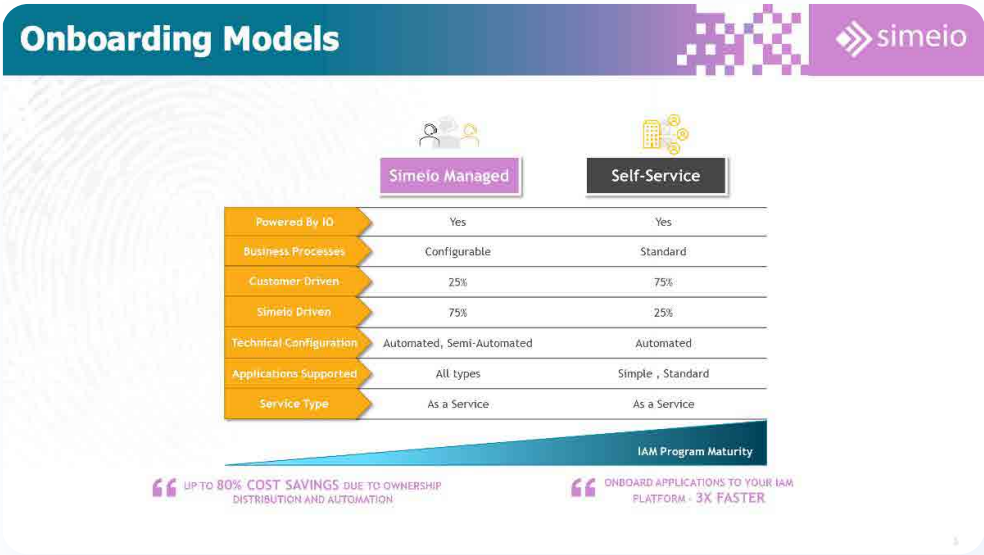

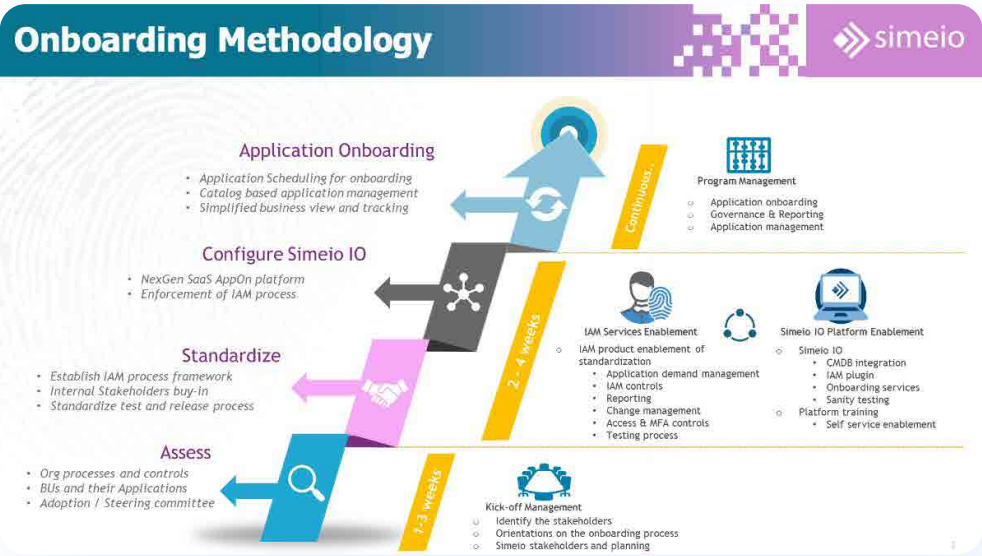

Improved ROI

Solution Benefits

Simeio IO creates the complete process for the orchestration of the application onboarding from the stage of the application analysis to the end state of the production deployment. This helps enable and build the standardized onboarding for the identity controls and govern the complete onboarding program using the IO analytics.

- Increase IAM adoption
- Scalability
- Enforce Security
- Program Governance
