SAVIYNT | HCLTech

HCLTech Solutions for Saviynt Healthcare Identity Cloud

Connect Everything. Securely.

Healthcare provider CISOs face significant challenges in today's rapidly evolving digital landscape, as they need to support both on-site and remote workforces while maintaining exceptional patient care. The shift to remote work has altered strategic plans for digital transformation, posing obstacles to productivity and security. Healthcare organizations need security solutions tailored specifically for the needs of their industry and ensure comprehensive protection for patient data on the cloud while maintaining strict regulatory compliance.

HCLTech offers organizations seamless implementation of the Saviynt Healthcare Identity Cloud (HIC), that leverages key healthcare use cases to offer a powerful solution atop Saviynt's industry-leading Enterprise Identity Cloud (EIC) architecture. Our offering is specifically designed to not only improve a healthcare organization's security posture but also simplify the complexities of identity management by enabling critical IGA capabilities, such as:

- Managing healthcare users' identity lifecycle
- End-to-end integration with Service Now, Saviynt HIC and Epic.
- Automate fine grained provisioning and governance of EHRs
- Streamline and secure complex identity governance workflows

The HCLTech and Saviynt solution encompass essential features that help organizations streamline identity governance and administration processes to produce numerous benefits, such as:
- Enabling uniform governance and administration of third-party healthcare ecosystem
- Reduces identity management CapEx and OpEx costs
- Faster Onboarding

Together, HCLTech and Saviynt assure that healthcare customers achieve:
- Seamless Identity Management
- Seamless Access Governance
- Accelerated Implementation
- Comply with regulations such as HIPAA, SOX, and PCI, ensuring your organization stays compliant and secure.
- Option to integrate with HCLTech's IAM accelerators for accelerated application onboarding and automations for BAU activities

Pre-configured JML rules and workflows for key use cases
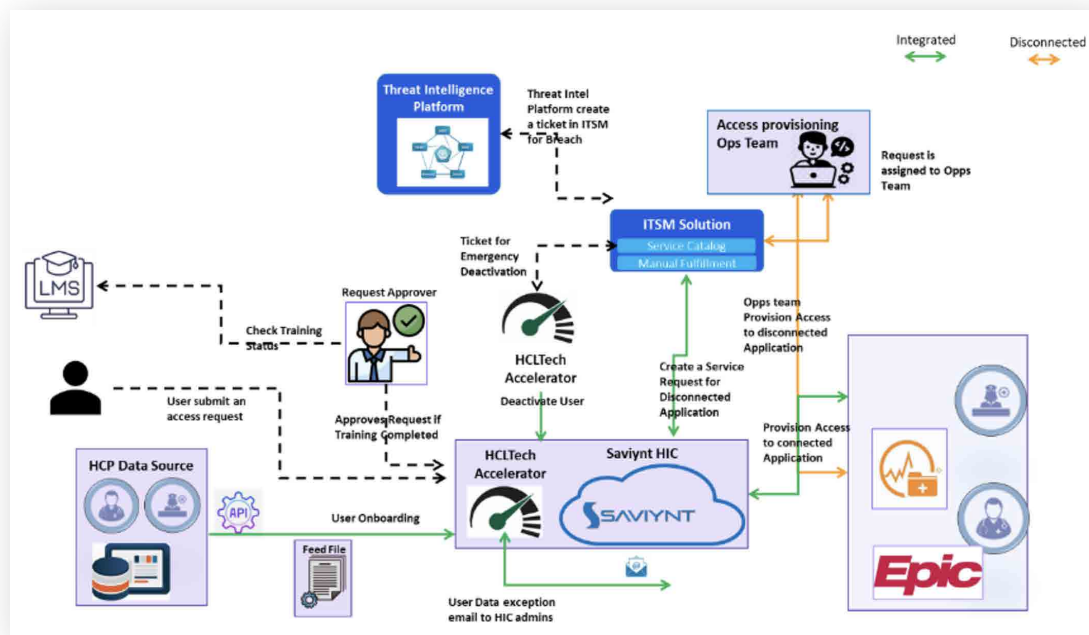

Pre-configured access certification templates, SOD rulesets and email templates

Up to 25% reduction onboarding time for customers through reusable JML rules, workflows and base configuration

Enabling uniform governance and administration of third-party healthcare ecosystem

Dashboards can be a great tool to provide an overview of how Saviynt IGA and business processes are operating across the board. It can help to highlight if any key area requires immediate attention and to identify potential gaps in the solution.

Dashboard solution can be delivered using packaged zip file containing SQL queries and JSON files for configurations along with deployment guide and SOP (Standard Operating Procedure)
