

SOLUTION GUIDE

IBM IAM Garage solution

Connect Everything. Securely.

Problem Statement

Is your organization grappling with a conventional IAM program struggling to keep pace with the rapid changes in the business landscape? Does your program rely heavily on outdated processes and technologies, necessitating extensive manual interventions? Are your security technologies equipped to meet the increasing demands and regulatory requirements placed upon them?

IBM's IAM Garage is built on our Enterprise Design Thinking methodology to engage business and security stakeholders, understand their pain points and priorities and build a high level roadmap for transformation of their Identity and Access Management.

Customer Value

Uncover growth and improvement areas for your IAM program, as well as increase awareness and ownership among the participants involved.

IBM has delivered Garage for IAM and other cybersecurity related subjects to more than 60 clients in Americas.

Shows high-value results quickly

- Discover what the stakeholders really need and co-create the future of IAM
- 1 week to execute
- 10 days to deliver report

De-risks your investments responsibly

- **Our Scope:** A collaborative and holistic review of your people, processes, and technology in the lens of identity. The engagement will dive into the key areas of your IAM program, uncovering areas where your organization could see short and long-term benefits.
- **The workshop includes reviews on these areas:**
 - TCO, user experience, and support
 - Aligning business strategy support to IAM
 - Compliance requirements and mandates
 - New technology initiatives and considerations
 - Identifying next steps for improvement

- **Offers the best hands and minds available:**
 - Senior IAM consultants and facilitators will conduct the sessions to obtain both qualitative and quantitative inputs to help uncover opportunities for your business.
 - Key participants include the Chief Information Security Officer (CISO) or other security leader, senior IT leaders (CIO), or Digital channel leaders (CMO or CDO). Other participants may include application or service owners, risk and governance leaders (CRO), Human Resources and audit or compliance. Participants will be required to comment on their current understanding and expectations from IAM solutions.
- **Works well remotely:**
 - This is a virtual, interactive session facilitated by senior IBM IAM consultants. It requires the use of a web conferencing tool.
 - A typical engagement will comprise of 3 meetings of 2,5 hours each.
 - Co-creation demands that the attendees are available and dedicated to each session's objectives.
