

SOLUTION GUIDE

I-AM Digital Converged Solution with Saviynt & Microsoft Entra

Connect Everything. Securely.

Simplify IAM with Convergence and Automation

The plethora of Personas, Identities, corresponding accounts, and their unique sensitivity profiles demands the need for a converged and simplified IAM approach. Disparate IAM solutions are a hindrance to security posture enhancement and obstruct an organization's ability to maximize the "signals" and "states" of Identities and accounts to drive effective security actions.

Inspira's vision with its "I-AM Digital" solution is to empower organizations with a simplified IAM approach through "Convergence and Automation" while being a catalyst for digitalization in alignment with your organization's security and business imperatives. This solution provides a comprehensive and seamless approach to managing identity and its access across an organization's landscape of systems and applications. Inspira can facilitate the organization to achieve high-fidelity interoperability between the two systems, Saviynt and Microsoft Entra.

Inspira's "iSMART2 (Intelligent | Simplified | Measurable | Adaptive | Risk | Threat Centric | Tailored) I-AM Digital" platform is powered by leading solution providers Saviynt and Microsoft which enables organizations to benefit from the true power of the converged IAM solution bringing in enhanced efficiency, improved security, maximized return on investments, enhanced user experience and elevated cybersecurity posture.

Achieve IAM Convergence with Inspira's I-AM Digital

Converged IAM solutions provide organizations with a comprehensive and integrated approach to managing identities and access, which helps improve security, increase efficiency, and enhance the user experience. Inspira's converged platform provides a structured approach to deliver the desired outcome for the seamless integration of disparate IAM technologies. Inspira's I-AM Digital framework and accelerators can be leveraged to help you achieve your Organization's IAM convergence goals.

The solution converges Saviynt and Microsoft Entra suite. The individual features leveraged from each solution are below:

Enhanced User Experience

Reduced TCO with Increased Operational Efficiency and ROI

Visibility across the Identity platforms

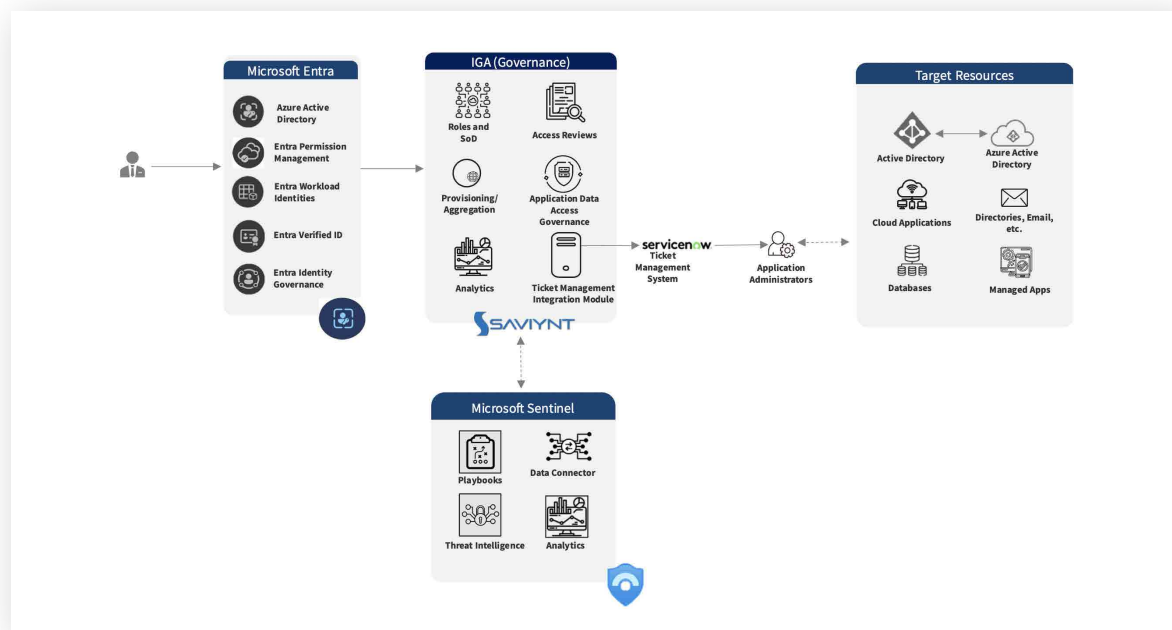

Elevate security posture

Enhanced Threat protection with reduced mean time to respond

- Azure Identity Protection (AIP) generates the signals based on the user's activity in the organization.
- Saviynt EIC consumes the signals triggered from AIP and takes preventive action to protect the organization by managing user access to applications, data, and other IT resources. It further sends the logs and user information to the SIEM solution for advanced investigation and monitoring.
- Microsoft Sentinel, a cloud-native security information and event management (SIEM) system, helps analyze and respond to security threats in real-time and coordinates with the respective source for closed-loop remediation.

This package solution will provide a single pane of glass that brings all IAM technologies deployed in the enterprise under one interface using advanced API and integration methods. The customer can access this solution via Azure Marketplace, Saviynt Exchange, and Inspira's website.

Saviynt Exchange

Connect Everything. Securely.

Truly Converged Solution

- Leveraging existing solution investments for end-to-end enterprise-wide IAM capabilities and enhanced cybersecurity posture
- Maximize the return on investment
- Enhanced compliance
- Minimal number of solutions to achieve end-to-end security

Reduced Operational costs

- Fewer investments in product training, management, and skilled resources
- Reduced time to IAM goals and vision delivery
- Streamlined operational processes
- Achieving automation with the reduction in manual intervention and reduced administration workload

Enhanced User experience

- A single pane of glass to manage the Identities across platforms
- Improved user experience and satisfaction
- Improved decision-making to identify and act on risks with real-time data and analytics
- Greater flexibility, scalability, and adaptability

About Inspira Enterprise

Inspira Enterprise is a global Cybersecurity Risk Management & Digital Transformation service provider across the Americas, Asia Pacific, Middle East, India and Africa regions. Inspira offers end-to-end cybersecurity services spanning advisory, transformation and operations powered by its proprietary iSMART2 (Intelligent | Simplified | Measurable | Adaptive | Risk Based | Threat Centric | Tailored) framework to mitigate cyber threats and risks. Connect with Inspira to build a flexible framework for IT orchestration and strengthen core business security with best-in-class cybersecurity solutions. Read more: www.inspiraenterprise.com.

About Saviynt

Saviynt is the leading identity governance platform built for the cloud. It helps enterprise customers accelerate modern cloud initiatives and solve the toughest security and compliance challenges in record time. The Saviynt Enterprise Identity Cloud converges IGA, granular application access, cloud security, and privileged access into the industry's only enterprise-grade SaaS solution.
