

SOLUTION GUIDE

IAM Migrations

Connect Everything. Securely.

Problem Statement

Customers move from one identity technology to another due to various business reasons. Huge challenges can occur while migrating the applications, as each technology speaks its own native language. Each requires a lot of time and effort to execute, which in turn affects the end users process during the tenure of the migration program.

Application migration simplified with Simeio IO. Using Simeio IO, we enable clients to strategically plan and execute the IAM migration programs with very minimal impact to the end users. Simeio IO provides the abstract unified UI across multiple IAM technologies and operates heterogeneously for any given request.

Customer Value

Simeio IO minimally impacts the users, helps with the governance on the migration program and the automation of migration which significantly improves the ROI.

Many clients who have used Simeio IO for their migrations, have faster and more efficient migration results.

Impact reduction

Automation + Bulk Onboarding

Time saving

Efficiency

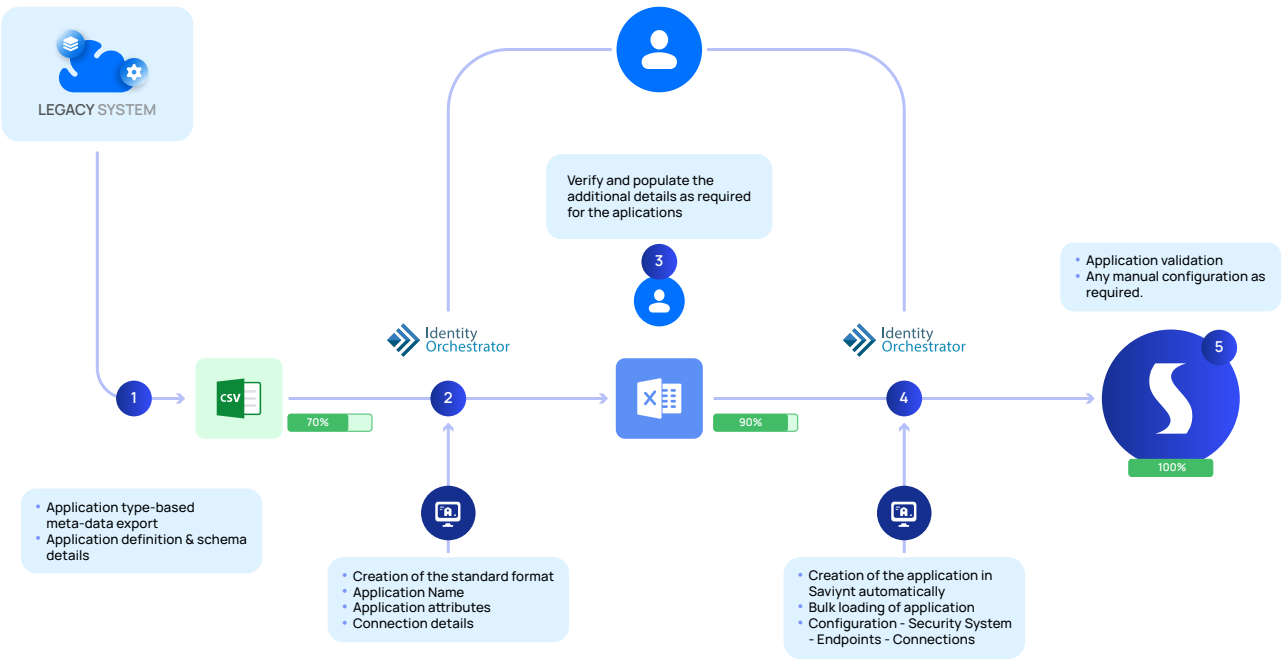

Smooth sunset process

Solution Benefits

Simeio IO helps customers migrate from any legacy or COTS technology to Saviynt technology. This helps to plan, build co-existence methodology, sunset process and build efficiency in the migration using the automation.

Migration planning
Co-existence model
Bulk Onboarding
Automation
Simplification

Prospects can reach out to <https://simeio.com/contact/> or any Simeio representatives to get the customized package based on their customer migration scenario.

About Simeio

Simeio is the world's largest single-source provider of Identity and Access Management (IAM) services. While a lot of IAM providers can give you the big picture, Simeio delivers the perfect picture for your unique needs and then helps you build it. We're a complete IAM problem solver for your company and the people who count on you.

About Saviynt

Saviynt is the leading identity governance platform built for the cloud. It helps enterprise customers accelerate modern cloud initiatives and solve the toughest security and compliance challenges in record time. The Saviynt Enterprise Identity Cloud converges IGA, granular application access, cloud security, and privileged access into the industry's only enterprise-grade SaaS solution.
